

IQVIA AI Management

Maximize benefits by quickly aligning your AI practices to established industry standards

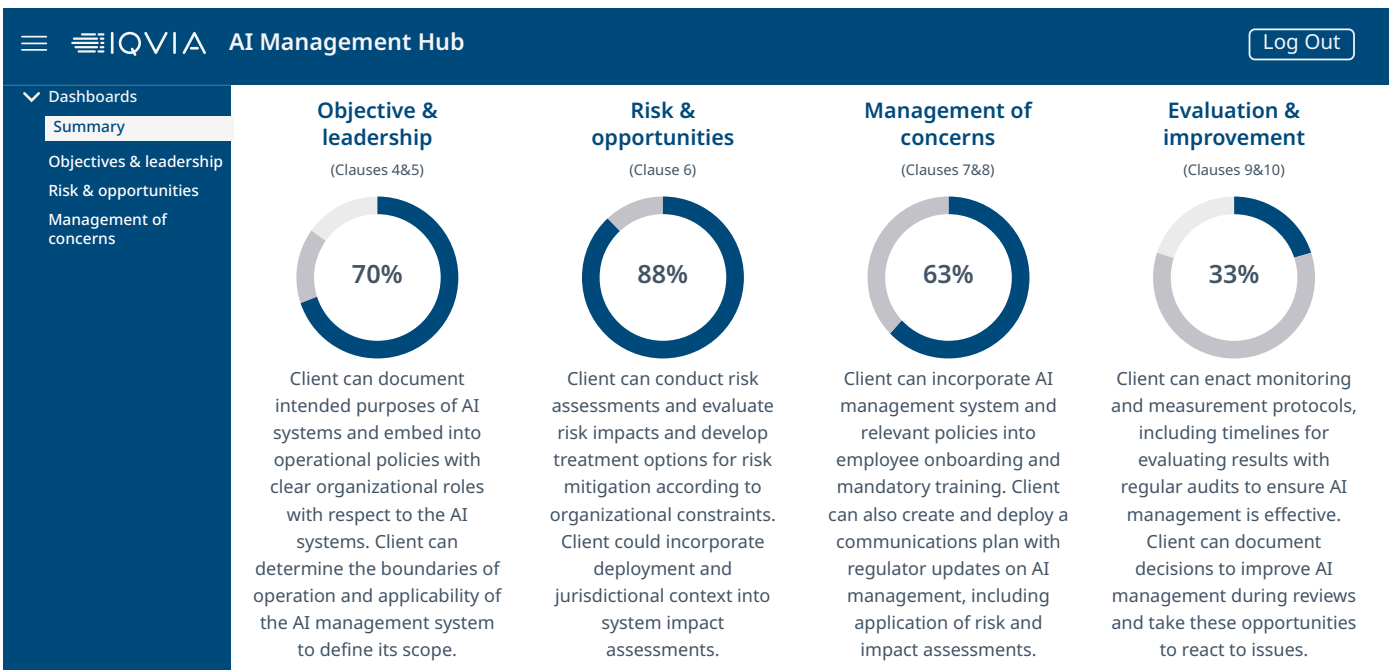

Easily navigate the complex requirements of stringent industry standards on AI safety, privacy, and cybersecurity. **IQVIA AI Management** scans your AI policies and scores documented activities against industry best practices, giving you an accurate and complete picture of where the gaps are, and actionable intelligence on bridging the divide.

Quickly gauge potential risks and identify opportunities to maximize the reliability, safety, and performance of your AI implementations.

Accelerate your AI policy gap analysis from weeks to days

IQVIA AI Management allows you to securely upload your policies and evidence of practices. Insights are automatically extracted from your documents and scored against established standards and best practice guardrails. Our technology, powered by IQVIA Applied AI Science, can enable 90% reduction in time and effort required to extract relevant content from documents. A comprehensive dashboard summarizes these scores and provides recommendations on areas for improvement. Each recommendation is ranked based on potential impact and your organization’s priorities, empowering you to identify the most relevant next actions.

Elevate your AI operations using an informed and balanced approach

Balance usability, effectiveness, and risk by leveraging IQVIA AI Management to improve your AI practices. Ensure that AI implementations are aligned to expectations and optimized for performance and safety, providing you with peace of mind and a clear path forward in the ever-evolving landscape of AI technology.

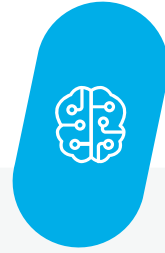

Focused benchmarking

Focus exclusively on AI practices that matter and the evidence needed to align against a single, detailed standard with implementation guardrails.

Intuitive dashboard

Easily achieve alignment across stakeholders on where attention is needed, through a summary dashboard that highlights best practice levels.

Tailored guidance

Make informed decisions about updating your practices to align with standards of AI management, by leveraging recommendations based on a robust scoring mechanism.

Choosing defensible data & AI

At IQVIA Applied AI Science, we specialize in making complex regulatory compliance achievable and understandable. IQVIA AI Management leverages input from leading AI experts, with the team's proven excellence demonstrated by 200+ publications in data protection & AI, innovative award-winning technologies, and 15+ years' experience in deploying AI/ML-based solutions in a safe and responsible manner for healthcare and life sciences organizations.
