

IQVIA Analytics Research Accelerator

Empower your cross-functional teams to efficiently generate reliable real-world insights

IQVIA's Analytic Research Accelerator provides a complete solution for cross-functional teams, to effortlessly unlock exclusive Real World Data and deliver rapid analytic capabilities.

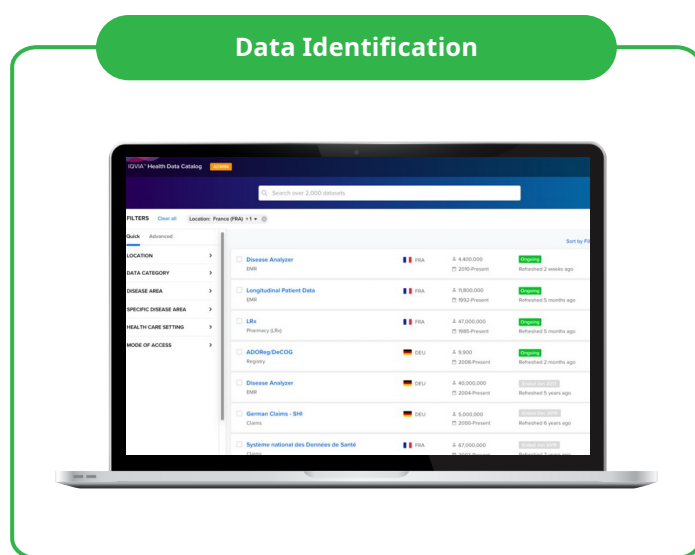

From data landscaping to real-world insights and evidence generation, this solution empowers teams to streamline analytics and generate reliable insights efficiently.

Data identification — rapidly identify the right data from the largest Real World Data catalog anywhere

Streamline data discovery with IQVIA's Health Data Catalog, profiling over 3,900+ global assets across 100+ countries, and easily onboard your own data sources to search through a single, intuitive portal. Quickly identify, search and filter new datasets and compare with your own data sources through a single, compliant, portal, saving time and money by avoiding duplication of effort.

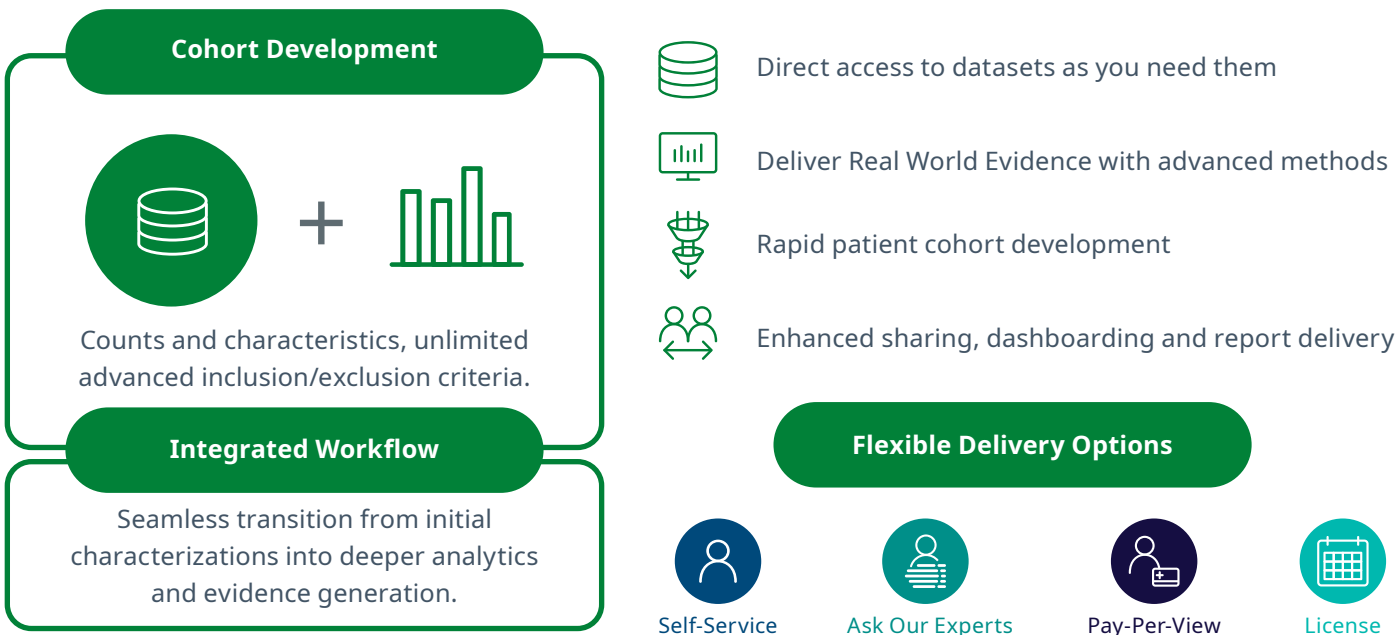

- Agnostic global metadata repository**
 Covering 3,700+ health data assets across 100+ countries
- Compare 250+ variables**
 Including content, access modes, use conditions and publications
- Relevant and up-to-date profiles**
 Be confident information is uniquely maintained and governed
- Save over 80% of time to identify**
 The most relevant data for your research needs
- Efficiently communicate**
 Share findings in multiple fully customizable export formats

Self-Service

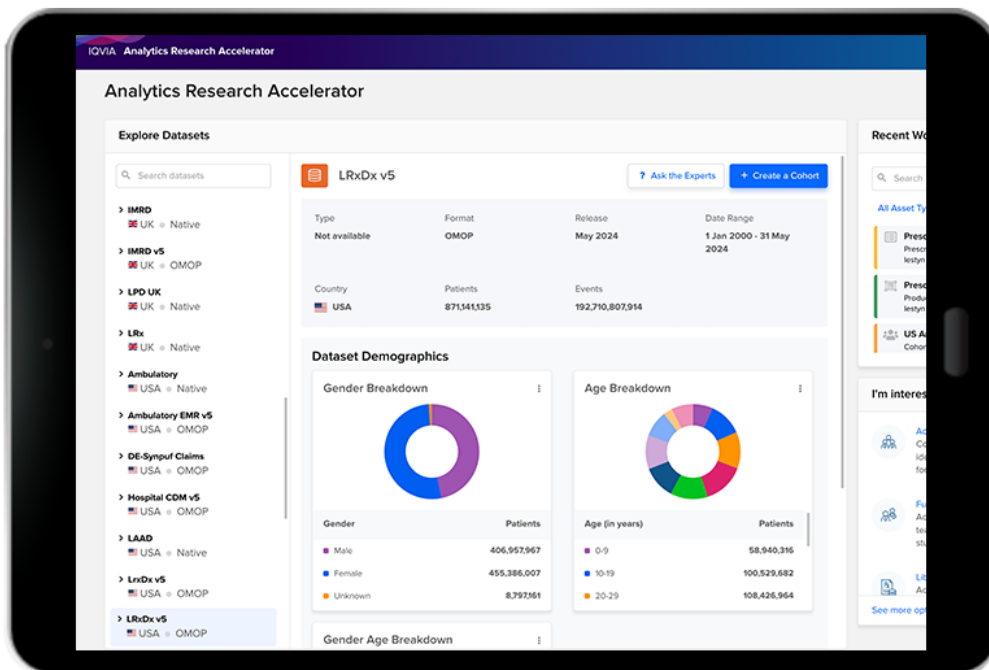

Cohort Development — streamline and improve Real World Data feasibility assessments

Access exclusive global Real World Data sources quickly, reliably, and cost-effectively. Leverage the Cohort Modelling self-service option capability to assess study data suitability and gain insights on your own, or Ask Our Experts to conduct feasibility studies against IQVIA global datasets on your behalf. Analyze drug usage, condition occurrences, procedures, visits, and more.

FREE access to Real World Data dashboards

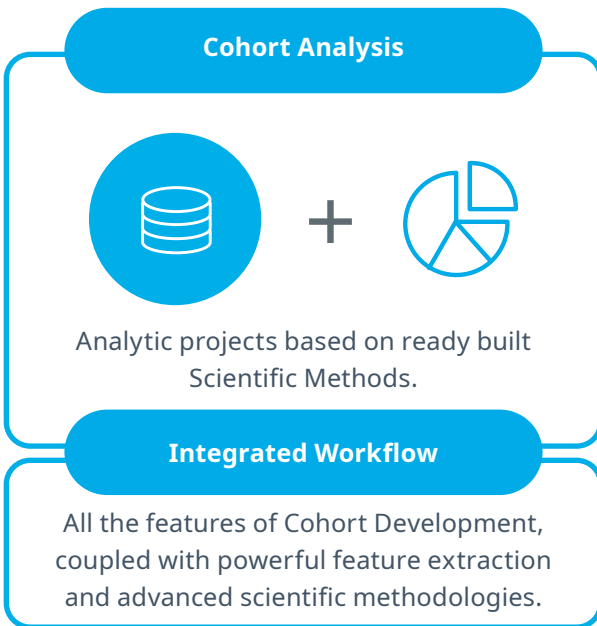

Gain instant access to patient counts, demographic insights, and quick feasibility assessments across multiple disease areas with FREE access to our Real World Data dashboards.

Cohort Analysis — global multi-database analysis made easy

Analyze with confidence either through self-service using IQVIA's combination of technology or through IQVIA expertise to quickly adapt to your way of working.

Locate, access, and analyze appropriate datasets to uncover insights and inform data driven decisions. Evaluate health patterns across global populations through our powerful cohort builder, scientific method library, and rapid analytic visualizations. IQVIA's team of experts are also able to design, develop and execute full RWE studies for your research questions — making use of our embedded expertise across multiple RWD data assets, from both internal sources and our extended federated network of partners.

-  Fast access to regularly refreshed data
-  Identify, enhance and aggregate patient populations
-  Analyze populations, uncover trends, generate insights
-  Proven scientific methods, no code environment

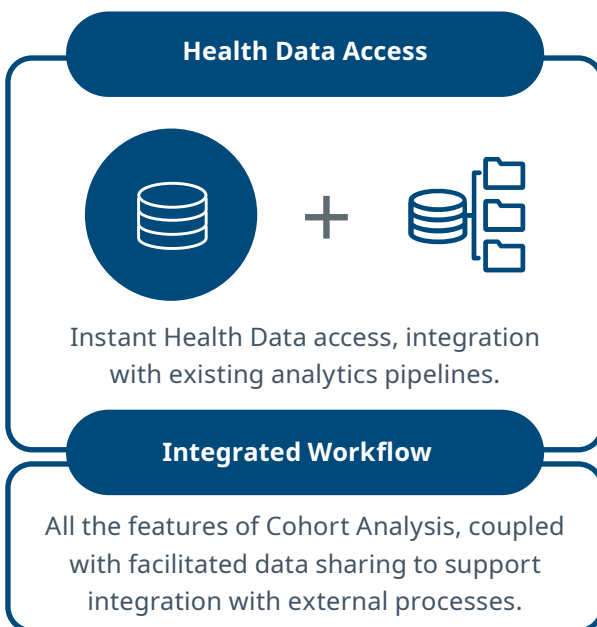

Flexible Delivery Options

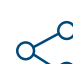

-  Self-Service
-  Ask Our Experts
-  Pay-Per-View
-  License

Data access — rapidly access, identify and transform large scale global health data

Accelerate and enhance your analysis with Health Data Access, a powerful and secure self-service Real World Data sharing solution. Seamlessly enable rapid analysis and define custom patient feature extractions to shape and deliver analytical-ready data for your pipelines with multiple delivery options such as Snowflake, AWS S3, and more.

Alternatively, use our Direct Data Delivery to download, host, and access fit-for-purpose Real World datasets directly.

-  Fast access to refreshed datasets
-  Identify patient populations in less time
-  Immediate Snowflake data access and connectivity
-  Enhanced process integration opportunities

Flexible Delivery Options

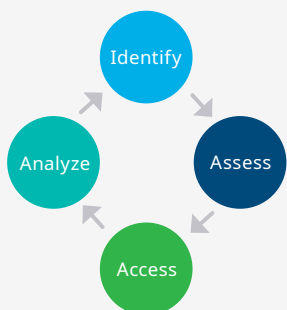

-  Self-Service
-  License

Flexible pay-per-use pricing plans enable you to scale up or down to meet the changing needs of your projects

Make faster and more informed decisions with our single-vendor solution. Leverage the highest quality data available and flexible pricing plans that allow you to access what you need to succeed when you need it.

Key takeaways

- Gain access to exclusive global Real World Data sources and networks, providing faster, cost-effective, and reliable analytics
- IQVIA's dedicated tools and expertise help reduce the complexity of dataset selection, providing comprehensive metadata and data profiles
- IQVIA's combination of technology and services quickly adapts to your way of working, supporting all levels of analysis and expertise
- Tailored pricing models support your unique analytic profiles and business needs, allowing you to purchase what you need, when you need it

IQVIA Analytics Research Accelerator

A complete solution for cross-functional teams, effortlessly unlocking exclusive Real World Data and delivering rapid analytic capabilities. From data landscaping to real-world insights and evidence generation, this solution empowers teams to streamline analytics and generate reliable insights efficiently.
