

IQVIA's Therapeutic Expertise Across Specialties

Your trusted partner in therapeutic breakthroughs

In the dynamic world of healthcare, IQVIA stands as a trusted partner for clinical development. Our mission to accelerate innovation for a healthier world starts with a passion to drive breakthrough treatments for patients. Bringing a wide range of therapeutic and specialty area knowledge and experience, we deliver insights and solutions that make a meaningful difference for patients.

IQVIA has more than fifteen Therapeutic and Specialty Centers of Excellence (CoEs), ranging from cardiovascular to reproductive health, to provide end-to-end therapeutic expertise throughout the clinical development lifecycle.

We are committed to advancing scientific innovation. Our teams of experts have authored more than 4,000 scientific publications in recent years, further demonstrating our broader impact on the scientific community.

We leverage our scientific and therapeutic knowledge to operationalize even the most sophisticated clinical trials involving cutting-edge therapies. As a leader in delivering complex cell and gene therapy trials, we have conducted over 200 such trials in more than 70 countries in the past five years. IQVIA has been instrumental in the development of nearly three out of every four drugs approved by the U.S. Food and Drug Administration (FDA) since 2016. IQVIA has also been involved in ~80% of genetic disease therapies during the same timeframe.

IQVIA's expertise is not limited to rare diseases. We are recognized for our proficiency in running large trials for high-prevalence diseases. Our recruitment of almost 200,000 patients into over 20 cardiovascular outcomes trials is unparalleled. This work has supported the FDA approval of three out of every four new cardiovascular drugs since 2016. In oncology, IQVIA has supported 46 regulatory approvals across 14 indications from 2020-2023.

**Helped develop 70%+ of all new
FDA-approved drugs**

**Delivering trials that change standard
of care for patients worldwide**

**A leader in therapeutic innovation
and regulatory science**

**Collaborate with 1,400+ partner
sites worldwide**

IQVIA's global reach and strategic partnerships are key to our success. We collaborate with over 1,400 partner sites worldwide and have invested in relationships with tertiary care medical centers. Our capabilities in sub-Saharan Africa are particularly noteworthy, as we were able to initiate a study of a Marburg Disease vaccine in Rwanda in a matter of days.

It takes an experienced partner to successfully execute clinical trials and bring novel therapies to market. By making intelligent connections, IQVIA brings together scientific expertise, therapeutic insights and clinical trial experience to accelerate new therapies from breakthrough science to patients. IQVIA's depth and breadth of reliable therapeutic expertise make us a trusted partner for sponsors of all sizes.

**Developing a vaccine, biologic, or therapy?
Let's talk.**
