

IQVIA HPA Non-Commercial Insights (NCI)

Hospital Data Services with additional non-commercial insights, providing visibility of non-commercial usage by type

What are HPA Non-Commercial Insights?

IQVIA HPA-Non Commercial Insights (NCI) are contained in Hospital Pharmacy Audit source data, these provide visibility of and distinguish non-commercial medicine usage by type.

Examples of typical non-commercial insights are

- Early access to Medicines Schemes (EAMS)
- Clinical trials
- Medicines provided Free of Charge (FoC)
- Patient Access Schemes (PAS)
- Compassionate usage
- Unlicensed Medicines (ULM) usage

HPA-NCI supports market understanding at a more granular level, with the ability to split commercial from non-commercial dispensing at national, brick and, for own products at hospital level.

Why use HPA-NCI?

- Gain a deeper understanding of the UK launch environment
- Unlock non-commercial secondary care medicines usage by speciality
- Cost effective, value for money pricing that builds on your HPA subscription
- Supports launch strategy, clinical trial monitoring, monitor competitor pre-launch activity and strategic pre-launch planning

HPA-NCI Reporting

- Flexible reporting frequencies are available, delivered in Excel file format; one-off reports, monthly reports or quarterly reports
- Reports at national, brick and, for own products, at hospital level
- Cost effective pricing based on your requirements and building on your current HPA subscription

KEY FEATURES

HPA-NCI provides visibility of and distinguishes non-commercial usage by type.

Related offerings
