

The Cost of 340B to Minnesota

Introduction

The 340B Drug Pricing Program is a federal program in which manufacturers provide heavily discounted drugs to qualifying hospitals and clinics. Despite claims by its advocates that it is “free”, it increases healthcare costs for employers and their workers due to lost drug rebates.¹ New research has estimated the financial impact of the 340B program on each state.²

The Cost of the 340B Program

- 340B is costing Minnesota employers and workers \$158M annually (see table)
- Additionally, there’s a projected cost of \$36M from a law mandating contract pharmacies, recently passed in Minnesota
- The cost of 340B per beneficiary for state and local government employers is about 6% higher than for commercial employers
- Minnesota has above average 340B activity, as summarized in “Minnesota’s 340B Landscape” below

Annual Cost of 340B to Minnesota

PER BENEFICIARY	TYPE	TOTAL COST	COST TO GOVERNMENT ³
\$51	Lost rebates	\$158M	\$22M
\$12	Contract pharmacy mandate	\$36M	\$5M
\$63	Total	\$194M	\$27M
