

The Cost of 340B to New Mexico

Introduction

The 340B Drug Pricing Program is a federal program in which manufacturers provide heavily discounted drugs to qualifying hospitals and clinics. Despite claims by its advocates that it is “free”, it increases healthcare costs for employers and their workers due to lost drug rebates.¹ New research has estimated the financial impact of the 340B program on each state.²

The Cost of the 340B Program

- 340B is costing New Mexico employers and workers \$54M annually (see table)
- This will increase to \$69M if New Mexico passes a law mandating contract pharmacies
- The cost of 340B per beneficiary for state and local government employers is about 6% higher than for commercial employers
- New Mexico has above average 340B activity, as summarized in “New Mexico’s 340B Landscape” below

Annual Cost of 340B to New Mexico

PER BENEFICIARY	TYPE	TOTAL COST	COST TO GOVERNMENT ³
\$76	Lost rebates	\$54M	\$13M
\$20	Contract pharmacy mandate	\$15M	\$3M
\$96	Total	\$69M	\$16M
