

The Cost of 340B to North Dakota

Introduction

The 340B Drug Pricing Program is a federal program in which manufacturers provide heavily discounted drugs to qualifying hospitals and clinics. Despite claims by its advocates that it is “free”, it increases healthcare costs for employers and their workers due to lost drug rebates.¹ New research has estimated the financial impact of the 340B program on each state.²

The Cost of the 340B Program

- 340B is costing North Dakota employers and workers \$53M annually (see table)
- This will increase to \$67M if North Dakota passes a law mandating contract pharmacies
- The cost of 340B per beneficiary for state and local government employers is about 6% higher than for commercial employers
- North Dakota has above average 340B activity, as summarized in “North Dakota ‘s 340B Landscape” below

Annual Cost of 340B to North Dakota

PER BENEFICIARY	TYPE	TOTAL COST	COST TO GOVERNMENT ³
\$130	Lost rebates	\$53M	\$10M
\$34	Contract pharmacy mandate	\$14M	\$2M
\$164	Total	\$67M	\$12M
