

The Cost of 340B to Pennsylvania

Introduction

The 340B Drug Pricing Program is a federal program in which manufacturers provide heavily discounted drugs to qualifying hospitals and clinics. Despite claims by its advocates that it is “free”, it increases healthcare costs for employers and their workers due to lost drug rebates.¹ New research has estimated the financial impact of the 340B program on each state.²

The Cost of the 340B Program

- 340B is costing Pennsylvania employers and workers \$227M annually (see table)
- This will increase to \$306M if Pennsylvania passes a law mandating contract pharmacies
- The cost of 340B per beneficiary for state and local government employers is about 6% higher than for commercial employers
- Pennsylvania has lower than average 340B activity but may experience higher growth if its metrics converge to national averages

Annual Cost of 340B to Pennsylvania

PER BENEFICIARY	TYPE	TOTAL COST	COST TO GOVERNMENT ³
\$36	Lost rebates	\$227M	\$27M
\$13	Contract pharmacy mandate	\$79M	\$9M
\$49	Total	\$306M	\$36M
