

# The Cost of 340B to Rhode Island

## Introduction

The 340B Drug Pricing Program is a federal program in which manufacturers provide heavily discounted drugs to qualifying hospitals and clinics. Despite claims by its advocates that it is “free”, it increases healthcare costs for employers and their workers due to lost drug rebates.<sup>1</sup> New research has estimated the financial impact of the 340B program on each state.<sup>2</sup>

## The Cost of the 340B Program

- 340B is costing Rhode Island employers and workers \$32M annually (see table)
- This will increase to \$39M if Rhode Island passes a law mandating contract pharmacies
- The cost of 340B per beneficiary for state and local government employers is about 6% higher than for commercial employers
- Rhode Island has above average 340B activity, as summarized in “Rhode Island’s 340B Landscape” below

## Annual Cost of 340B to Rhode Island
