

# The Cost of 340B to South Carolina

## Introduction

The 340B Drug Pricing Program is a federal program in which manufacturers provide heavily discounted drugs to qualifying hospitals and clinics. Despite claims by its advocates that it is “free”, it increases healthcare costs for employers and their workers due to lost drug rebates.<sup>1</sup> New research has estimated the financial impact of the 340B program on each state.<sup>2</sup>

## The Cost of the 340B Program

- 340B is costing South Carolina employers and workers \$121M annually (see table)
- This will increase to \$153M if South Carolina passes a law mandating contract pharmacies
- The cost of 340B per beneficiary for state and local government employers is about 6% higher than for commercial employers
- South Carolina has above average 340B activity, as summarized in “South Carolina’s 340B Landscape” below

## Annual Cost of 340B to South Carolina

PER BENEFICIARY	TYPE	TOTAL COST	COST TO GOVERNMENT <sup>3</sup>
\$54	Lost rebates	\$121M	\$20M
\$14	Contract pharmacy mandate	\$32M	\$5M
<b>\$68</b>	<b>Total</b>	<b>\$153M</b>	<b>\$25M</b>

## South Carolina’s 340B Landscape

340B utilization<sup>4</sup>

**15%** This is above the national average of 12%

340B facilities/100k pop.

**14.8** Cost of 340B can grow higher since national average number is 15.8

Medicaid expansion<sup>5</sup>

**No**
